STAT

At the Noon Meeting today Mr. Bannerman mentioned that the question of Archives and historical records came into the discussion at the Deputies meeting last Wednesday.

He feels that the time is ripe to make a presentation on a centralized structure of the records program. He is becoming impatient because he sees no evidence of any action having been taken and he said again that he wants "to get moving on this."

May I have whatever you have been able to do with this proposal by COB Wednesday - 15 Oct 69 so I can try to do something with it before the end of the week.
